

ALI HASSAN

DevOps Engineer | System Administrator | Linux Systems & Infrastructure

Lahore, Pakistan | hassanrajpoot4414@gmail.com | +92-324-1164855 | linkedin.com/in/alihassan4414 | github.com/hassanrajpoot14

PROFESSIONAL SUMMARY

DevOps Engineer and System Administrator with 1.5+ years managing production Linux infrastructure, Dockerized deployments, and CI/CD pipelines. Skilled in server hardening, cloud solution architecture (Huawei Cloud, AWS), network security, and database administration, with hands-on experience sustaining 99%+ uptime across live client-facing environments.

TECHNICAL SKILLS

Operating Systems & Virtualization: Linux (Ubuntu, CentOS, Red Hat), Windows, KVM / Virtualization Platforms

Systems & Network Administration: System Monitoring, Patch Management, Routing, Switching, Firewalls (UFW), TCP/IP, SSH, Hardware/Software Troubleshooting

DevOps & Cloud Infrastructure: Docker, Docker Compose, Git, GitHub, GitHub Actions, CI/CD Pipeline Design, Huawei Cloud Solution Architecture, AWS Fundamentals, Bash Scripting

Databases & Scripting: SQL, PostgreSQL, Database Administration (Backups, Access Control, Performance Monitoring), Python, C++

PROFESSIONAL EXPERIENCE

DevOps Engineer | Softex Solutions, Lahore, Pakistan

2026 - Present

Linux Administration, SSH, UFW Firewall, Git/GitHub, CI/CD Pipelines, Docker

- Own end-to-end DevOps operations for production infrastructure, administering Ubuntu and CentOS Linux servers with system configuration, patch management, and proactive monitoring to sustain **99%+ uptime**.
- Harden server security by configuring SSH key-based authentication and implementing **UFW firewall rules**, minimizing unauthorized access across production environments.
- Design and maintain CI/CD pipelines using **GitHub Actions**, automating build, test, and deployment workflows for containerized applications built with Docker.
- Enforce GitHub branching strategies and lead infrastructure documentation efforts, authoring runbooks that standardize **incident response** and reduce onboarding time for new engineers.
- Collaborate cross-functionally with engineering teams to manage Git repositories, conduct code reviews, and ensure reliable, secure deployment workflows across development and staging environments.

System Administrator | DevSystem Creation, Lahore, Pakistan

1 Year

Linux Server Administration, Network Security, Virtualization, Database Management, Hardware Troubleshooting, System Monitoring

- Managed end-to-end installation, configuration, and maintenance of Linux operating systems and **virtualization platforms** across company infrastructure.
- Supervised network management operations, configuring routing, switching, UFW/firewall rules, and enforcing **network security** best practices.
- Conducted regular **database administration** tasks, including automated backups, user access control, and query performance monitoring.
- Utilized system monitoring tools and executed routine patch management to ensure **high availability** and proactive incident resolution.
- Provided tier-2 technical troubleshooting for desktops, laptops, peripherals, and core business applications, resolving user issues within strict SLAs.
- Documented technical IT procedures, network configurations, and incident runbooks to standardize system recovery workflows and communicate effectively with non-technical stakeholders.

PROJECTS

University Admissions Portal - Huawei Cloud Solution Architecture | Case Study 2026

Huawei Cloud, Solution Architecture, Auto-Scaling, High Availability, Data Security, Cost Optimization

- Designed a Huawei Cloud solution architecture for a university online admissions portal supporting **50,000+ peak concurrent users**, using auto-scaling compute and load balancing to handle demand spikes.
- Architected secure document and photo upload workflows using object storage with **encryption-at-rest**, meeting data protection requirements for applicant records.
- Defined a high-availability, **multi-zone architecture** with automated failover to guarantee uptime during peak admission cycles.
- Optimized the architecture for cost efficiency, balancing reserved and on-demand resources without compromising performance or availability.

Beauty Byte - Containerized Web Application | Personal Project 2026

Docker, Docker Compose, Git, GitHub, Live Production Deployment

- Containerized full web application stack using Docker and **Docker Compose**, building isolated, reproducible service environments.
- Deployed, configured, and stabilized the application on a live production server, troubleshooting environment and container issues to ensure consistent uptime and reliable service delivery.

BazaarHub - Marketplace Application | Personal Project 2026

Docker Compose, PostgreSQL, Service Orchestration, Live Production Deployment

- Orchestrated multi-service architecture integrating **PostgreSQL** with automated schema migration scripts.
- Deployed and stabilized the marketplace application on a live production server, managing service orchestration, environment configuration, and post-deployment monitoring to maintain consistent uptime.

Sentinel - Server Security Monitoring Dashboard | Personal Project 2026

Linux, Server Monitoring, Security, Dashboard Development

- Designed and built a custom server **security monitoring dashboard** to track IP access logs, intrusion attempts, and suspicious processes in real time, complementing existing Cockpit and Portainer infrastructure tools.
- Deployed the monitoring solution on a live production server, giving the operations team an at-a-glance view of security events and reducing incident detection time.

EDUCATION

Bachelor of Science - Software Engineering | GPA: 3.56 / 4.00

Superior University, Lahore. Relevant Coursework: Operating Systems, Database Systems, Computer Networks, Software Design & Architecture

FSc - Superior College, Lahore

Matriculation - BISE Faisalabad

CERTIFICATIONS & TRAINING

- **Huawei Certified ICT Expert - Cloud Solution Architecture (Advanced Level)** | Huawei
- **Red Hat Enterprise Linux (RHEL)** | Red Hat Training - 2026
- **Introduction to SQL** | SoloLearn - May 2025
- **Coding Foundations** | SoloLearn - Apr 2025

LANGUAGES

English (Professional Working Proficiency) | Urdu (Native) | Punjabi (Native)
